

Izvjestaj studentske prakse - sruvic1

Raiffeisen Bank BiH | Generirano: 17.06.2026

PODACI O STUDENTU

Ime i prezime : Suljo Ruvic
Username : sruvic1
Repozitorij : rbbhofficial/studentskapraksaTema3
Period prakse : 03.05.2026. - 17.06.2026.
Stack : .NET 8, Blazor Server, Keycloak, PostgreSQL, Docker, nginx

PREGLED AI SESIJA (Claude Code)

Datum	Kategorija	Usteceno	Trajanje	Opis
10.06.2026.	code_generation	60 min	30 min	US93 Frontend: Blazor UI kucice Prodaja i Kolateral oficir - komponente, servis, host stranica
11.06.2026.	documentation	120 min	40 min	Sprint 12 finalna isporuka - 10 dokumentacijskih artefakata za NRS-Grupa3
12.06.2026.	code_generation	25 min	15 min	Rijesen merge konflikt u MainLayout.razor; conditional nav link za orders:view permission
14.06.2026.	infra_setup	30 min	20 min	Fix nginx 502 upstream sent too big header - proxy_buffer_size za JWT auth cookie
15.06.2026.	debugging	35 min	20 min	Fix hardkodiranih ID-ova za tipove kolaterala u AppraisalOrderSeeder - dinamicki codebook lookup
15.06.2026.	debugging	25 min	15 min	Fix back dugmeta (history.back umjesto hardkodirane rute)
15.06.2026.	debugging	15 min	8 min	Uklonjen hardkodirani sidebar link "Procjena narudzbe" koji je vodio na /narudzbe/1/procjena
15.06.2026.	debugging	35 min	20 min	Seeder nije kreirao AcceptCAOrder taskove za SubmittedBySales narudzbe
15.06.2026.	debugging	20 min	15 min	Fix EF correlated subquery u SeedMissingCaTasksAsync - global query filter blokirao taskove
15.06.2026.	debugging	35 min	25 min	Fix 400 BadRequestException na PUT /api/orders/{id} - autosave bool bio non-nullable
15.06.2026.	code_generation	120 min	90 min	Android Spirala 2 - Open-Meteo API integracija, Room baza, WeatherMapper, WeatherRepository, ViewModel, UI
15.06.2026.	debugging	60 min	25 min	Fix PrognozaActivity crash (NoActionBar tema), Room Flow, Toast timing, fallbackToDestructiveMigration
16.06.2026.	code_generation	60 min	25 min	Fix MyTasks "Zavrshi task" bug + BranchCatalog konsolidacija + nginx root location proxy buffer fix

Ukupno: 13 sesija | 348 min trajanje | 640 min ušeceno (~10h 40min)

STA JE IMPLEMENTIRANO

Backend (.NET 8 / Clean Architecture)

- Keycloak OIDC integracija - JWT cookie, token refresh, ROPC flow
- PostgreSQL + Entity Framework Core 8 - migracije, seederi, audit trail
- IEndpointModule pattern - auto-discovery API endpointa
- WorkflowTaskService - Open -> Accept -> Complete tok zadatka
- AppraisalOrderService - CRUD narudzbi s lifecycle metodama
- DocumentService - upload, download i audit za pritozene fajlove
- OpinionService - misljenja CO i Pravne sluzbe (US94)
- BranchCatalog - jedinstven izvor podataka za poslovnice (kod, naziv, grad, adresa)
- AuditService - sve poslovne akcije upisane u audit log
- JMBG i Porezni broj validatori - custom DataAnnotations atributi
- SeedMissingCaTasksAsync - idempotentni seeder za workflow taskove
- GET /api/branches - dinamički endpoint za podatke poslovnica
- DPNPN-108: GET /api/orders/{id}/document + POST reminder vjestaku

Frontend (Blazor Server)

- LoginPage - Raiffeisen branding, fail-fast validacija
- SelectRole - odabir poslovne uloge pri prijavi (AM, SM, UB, CA, CO)
- Home.razor - personalizovana pocetna stranica za svaku ulogu
- CreateOrder.razor - forma s Leaflet mapom, grad/poslovnica filter, BranchApiService
- MyTasks.razor - lista zadataka s Accept/Complete tokom, paging, duplicate guard
- OrderDetails.razor (CA) - pregled narudzbe, prihvatanje, upload dokumenata
- NarudzbaProcjena.razor (CO) - kucice za akciju, upload CO/Pravna misljenja
- DocumentUploadSection - prilaganje fajlova uz validaciju
- Us93SalesActions - prodajne akcije, server-side preuzimanje finalne procjene
- Dashboard Kolateral administratora - KPI kartice, lista narudzbi
- Users & Roles admin UI - pregled korisnika, dodjela rola iz Keycloaka
- Codebook management UI - tipovi i vrijednosti sifarnika
- Audit log UI - filteri datuma, live search s debounce-om, paging
- Notification bell - permissioni-based obavjestjenja
- AppStatusBadge, AppEmptyState, AppErrorBanner - reusable UI komponente

Infrastruktura (Docker / nginx / Keycloak)

- Docker Compose - api, web, db, keycloak, nginx servisi
- nginx reverse proxy - routing api/web, WebSocket upgrade za Blazor SignalR
- nginx proxy buffer settings - rijesen "upstream sent too big header" za JWT cookie
- Keycloak realm auto-import pri pokretanju kontejnera
- AM/SM/UB/CA/CO role mapping u Keycloak realmu
- PostgreSQL perzistentni volume

Testiranje i dokumentacija

- Unit testovi: Domain entiteti, Security, Dtos (Faza 0+1 coverage)

- Vodic za testiranje poslovnih procesa DPNPN-90..94
- Kompletna lista test korisnika i kredencijala u README
- Sprint dokumentacija: specifikacije, dijagrami, testni plan, deployment vodic

GIT HISTORIJA PO FAZAMA

Sprint 1 - Temelji platforme (03.05 - 30.05.2026.)

- 03.05. - Initial commit, Clean Architecture struktura (.NET 8, Blazor, Keycloak, PostgreSQL)
- 28.05. - feat: phase-1 backend foundation - DDD entiteti, EF migracije, Docker Compose
- 28.05. - feat: DPNPN-30 pregled korisnika i rola (Clean Architecture)
- 29.05. - feat: GET /api/me endpoint sa profilom prijavljenog korisnika
- 29.05. - DPNPN-31: PUT endpoint za promjenu role korisnika
- 29.05. - DPNPN-47/48/49: Backend validacije - JMBG, Porezni broj, Afikati
- 29.05. - DPNPN-64/65/66/70: Codebook modul - tipovi, vrijednosti, CRUD
- 30.05. - refactor: SOLID/DRY/KISS cleanup + GET /api/me/permissions endpoint

Sprint 1 - Login i role (01.06 - 05.06.2026.)

- 01.06. - FE-ROLE-01-02: UI za upravljanje korisnickim rolama
- 01.06. - feat: Login forma - Raiffeisen branding, fail-fast validacija
- 01.06. - feat: Povezi frontend s backend API-jem (OIDC / JWT cookie)
- 02.06. - DEVOPS-01: Keycloak realm export i auto-import
- 02.06. - feat: PostgreSQL + Keycloak konfiguracija u .NET API-ju

Sprint 1 - Dorade i stabilizacija (08.06 - 09.06.2026.)

- 08.06. - feat: Sprint 1 dorade - login, seed, migracije, CSV export, dashboard
- 08.06. - fix: Keycloak Admin API admin-cli fallback
- 09.06. - feat(US-1/US-2): Iniciranje narudzbe procjene + kombinovani kolateral
- 09.06. - feat(UX): Enterprise redizajn forme - Leaflet mapa, grad/poslovnica filter
- 09.06. - security: Audit neovlastenih pristupa narudzbama
- 09.06. - feat: Live search s debounce 400ms (korisnici, audit log, codebook)

Sprint 2 - Workflow narudzbi (10.06 - 15.06.2026.)

- 10.06. - feat(US93): Blazor UI kucice Prodaja i Kolateral oficir
- 11.06. - feat: WorkflowTaskService, MyTasks - foundation za US 92/93/94
- 12.06. - feat: CO odobrenje finalne procjene
- 13.06. - feat(T7 US94): Backend misljenja CO i Pravne sluzbe
- 13.06. - DPNPN-105: Document upload servis i endpointi
- 14.06. - feat: DocumentUploadSection komponenta (US-92)
- 14.06. - Implementacija dashboarda Kolateral administratora
- 15.06. - feat: GET /api/orders/{id}, real-data wiring, testne narudzbe za US92/93/94
- 15.06. - DPNPN-108: Backend za preuzimanje originala procjene + reminder vjestaku
- 15.06. - test: Domain/Security/Dtos unit testovi (Faza 0+1 coverage)
- 15.06. - feat: CA workflow - pregled dokumentacije, CO provjera, slanje vjestaku (Faza A-D)
- 15.06. - fix: autosave query param, SeedMissingCaTasksAsync, back dugme, sidebar link

Sprint 2 - AM/SM/UB role model + refaktoring (16.06.2026.)

- 16.06. - feat: AM/SM/UB role model - AccountManager, SalesManager, UnitBoss u Keycloak realmu
- 16.06. - UI refaktor - Home.razor, SelectRole.razor uskladeni sa novim rolama
- 16.06. - Document download audit - server-side fetch, potpun audit trail
- 16.06. - fix: BranchCatalog - konsolidacija 3 hardkodirana izvora u jedan katalog
- 16.06. - fix: nginx root location proxy buffer (upstream sent too big header)
